

SPEED GATE TURNSTILE

HG - 145 - S | HG - 145 - C

SERIES

Your gate to protection...

HG-145 Series are durable products that can be used indoors. Provides access and access control in areas requiring moderate security. With its compact design, it provides the perfect solution for assembly areas where aesthetics and elegance are important.

Barrier arm movement is provided by the Brushless DC motor with PLC control. Five optical sensors in the turnstile provide control of access control scenarios. Speed Gate Turnstiles are suitable for intensive use. It is the perfect solution when architectural design, aesthetics and transition speed are important.

Design

- ▶ The main body of the turnstile is made of 304 stainless steel and the wings are made of 15mm plexiglass material.
- ▶ Stain case design with smoothened corner.
- ▶ All other parts in turnstile are electro-galvanized against corrosion.

Safety

- ▶ Obstacle movement of the wings is provided by PLC controlled "Brushless DC Motor".
- ▶ Heavy duty mechanics, controlled by reliable electronics ensure a long product life with minimum maintenance requirement.

Integration

- ▶ Easy integration with all access control equipment through functional electronic control board (For example: RFID Device, Button Control, Finger Print and Biometric Device)

HG - 145 - S

Single Wing

- ▶ Turnstile main body is 304 stainless steel.
- ▶ It provides 550mm wide passage with standard wing.
- ▶ The top cover is made of black glass with 10mm tamper.

HG - 145 - C

Double Wing

- ▶ Turnstile main body is 304 stainless steel.
- ▶ It provides two 550 mm wide transition areas with corresponding standard wings.
- ▶ The top cover is made of black glass with 10mm tamper.
